

## THE ADVOCATE.

## THE FARM AND THE FARMER.

It is estimated that eight dollars' worth of fertility goes off the farm with every steer.

The best of everything raised on the farm should be kept for the use of the farmer and his family.

Pear juice, heated to 108 degrees and sealed in bottles, will not only keep well, but prove a refreshing drink in winter.

It pays to study the science of breeding farm stock. The experience of the most successful farmers is that only pure-bred sires can be profitably bred for meat or milk.

The fungus which causes the potato rot has been found in the healthy tuber. It requires moist, warm weather to develop the potato blight fungus. Spraying with the Bordeaux mixture is the remedy.

A good way to prevent a butter bowl from cracking by scalding is to take it when new, put it in a tub of water so that the inside and outside of it will soak at the same time and thereafter it can be used and scalded with little danger of cracking.

In the orchard never plant deeper than the tree stood in the nursery row. Never omit applying a mulch to young trees if there is the slightest danger of a drought. Never forget that low, stout, (not stunted) trees are preferable to tall, slender ones.

The young women of Hammon, N. J., are competitors in raising chickens, and the town has more poultry than any other in the State. Under a single roof a prominent breeder had as many as 8,000 broilers at once, as well as 2,000 hens. In one season Hammon has sent 60,000 birds to market.

The experimental work attempted, both in Maine and elsewhere, to determine the value of spraying to protect fruit against disease and insects, would lead to the conclusion that it is a field fruitful, to the careful, painstaking investigator. The problem is by no means solved, and there is need of caution; but at the same time it seems evident that a way may be opened to clear our orchards and vines from destructive pests.—[The Maine Farmer.]

Fancy poultry raising is carried to some ridiculous extremes, as poultry exhibitions show. Ducks have become the swans and the color of pheasants and partridges. The ordinary barnyard fowl has been subjected to such "high breeding" that it often looks more like an eagle, a vulture, a blackbird or dove than it does like a respectable hen. Pigeons are especially absurd. Some have heads so turned that they seem to dwell under the shadow of their own tails.

When the milk or cream are held too long, although it may be in a cold temperature, in which the ordinary acidity may not be developed, a bitter taste is often developed which is imparted in butter and destroys its value. It is the opinion of our experts that this bitterness of putrefactive ferment, which is peculiar to a cold temperature, and not active or marked as in the case of the milk, but more insidious and sure to manifest itself more less rankly, according to the conditions. The remedy is, never to hold the milk for the cream to rise longer than twenty-four hours, and the cream not longer than thirty-six hours. Under specially favorable conditions and surroundings the time may possibly be extended. It is not, however, a safe rule to insure sweet and good butter; the earlier churning and skimming are recommended. If the conditions for butter-making will not admit of these safe rules being applied, the conditions should be made to conform to them.—[New York Dairy Commissioner.]

Pity the cow that falls into the hands of the "natural" cow doctor, whose knowledge of a cow is self-conferred, and whose whole pharmacy of remedies is physics, bleeding and boring the horns for horn ail. One of the accomplishments of this doctor is making a cud for a cow, a half-dead fish being the chief ingredient in the new (?) cud. Better by far is the modern way of writing to the veterinarian of a distant agricultural paper, and awaiting the reply, which gives the cow three weeks in which to get well on her own account. Five times out of ten, the best remedy for a sick cow is keeping her on a nice dry bed, given stimulating drinks if she will take them, and then let the

cow do the rest. The cruelties perpetrated by ignorant practitioners are often frightful, in cases of obstructed parturition. When assistance is needed beyond the simplest effort, a skilled doctor should be procured. Watch him and his plans closely, and, in a similar difficulty, the owner, by care and caution, may render assistance that will be about as efficient as a professional. One thing should be avoided, that of giving a sick cow all the doses suggested by the neighborhood oracles. Give the cow half a chance for her life, and don't risk the other half by trusting to the wisdom of a quack.—[Practical Farmer.]

## Opinions of the Trade South.

I find Chamberlain's medicines very excellent, particularly Chamberlain's Cough Remedy.—B. E. Etheridge, Hallettsville, Texas.

I have tried Chamberlain's Cough Remedy with great success.—R. Tanageret, Waveland, Miss.

Chamberlain's Cough Remedy cannot be beat.—W. L. Davis, Liberty Hill, La.

I have used Chamberlain's Cough Remedy in my family, and consider it the best I have ever tried.—W. J. Flowers, Doraville, Ga. 50 cent bottles for sale by T. G. Julian.

## Carelessness That Kills.

A month ago a young lady stepped on an inverted rake so that one of the iron teeth passed through her shoe and entered the fleshy part of the great toe. The wound was slight and soon healed. Two weeks later she complained of unpleasant stiffness about her jaws. The physician called to attend the supposed "mumps" pronounced it lockjaw. Within two days the muscles of the lady became rigid and spasms soon followed. They were so severe that chloroform was administered to quiet the patient, but even at times it required the combined strength of four men to hold her on the bed. Four days ago the muscles of the throat became stiff and she could follow neither food nor medicine, which had to be administered through a tube inserted in the throat. She became unconscious, and gradually the respiratory muscles grew rigid and her breath was slowly shut off, until she died. The painfulness of so exact a description of her suffering might be averted except that it is desirable, when it is remembered that the general rule upon farms is to throw down a tool, as may be, when it is no longer in use. In line with this, is the danger imminent, when old nails, bits of broken glass and harmful refuse is thrown away carelessly. Only a few days since a carpenter stepped on an upturned rusty nail which penetrated his shoe; later lockjaw was revealed, and after untold agony death resulted. These cases show the need of care not only for things for which we have use, but equally for those which we may have discarded as of no further value to us.—[Massachusetts Ploughman.]

STATE OF KENTUCKY, }  
MONTGOMERY COUNTY, } SCT.

This day personally appeared before me, a Justice of the Peace in and for the county and State aforesaid, Henderson Phipps, who made oath that two stray steers about four years old each, one a pale red, will weigh about 1,400 lbs., the other, dark red, will weigh about 1,500 lbs., neither of them having ear marks or brands, were taken up by Henderson Phipps, near his farm, on the 19th of September, 1891. I further certify that I have personally examined the said strays and value them at eighty dollars. The taker-up of said strays, Henderson Phipps' residence is near Stepstone Station, Montgomery county, Kentucky. This notice has been duly recorded in my office, and a copy hereof delivered to said Henderson Phipps. This 6th day of October, 1891.

JNO. A. THOMPSON,

10-4t J. P. M. C.

Louise de Beaulieu, a famous French "vivandiere," who, in company with her regiment, was under fire in eight battles, has been reduced to the expedient of selling matches in Paris for a living. She has a long record of heroic deeds, one of her feats of bravery being that of saving the life of a child from the sixth story of a house that was burning in the Rue St. Honore. At Champigny she lost an arm while carrying a wounded soldier to an ambulance. A London newspaper deplores her hard fate, but are the Queen's veterans of Waterloo and the Crimea much better off?

## Professor Thomson.

Prof. Elihu Thomson, the man whose brain has worked out most of the mechanical ideas that have made the Thomson-Houston Company rich and famous, is only about five feet, four inches high, or perhaps a little taller. His figure is boyishly slight, and his face is very young in appearance. As it is, he is a few years short of forty. He was always famed for his precocity, and he had to wait two years before he could enter the high school in Philadelphia, because he was so young. He was a professor of chemistry before he was twenty-three years old. When he was eleven years old he began experimenting with Leyden jars, and continued experiments in electricity uninterruptedly until he was thirteen years of age. He lived in Philadelphia, and when he would try his apprentice hand on his first dynamo he used to travel into the woods away from home to strip the elderberry bushes and get elder pith to make insulating material. He ought to be worth hundreds of thousands of dollars to-day, but he is comparatively poor, and he devotes his energies to the supervision of the technical electrical works of the company exclusively. Professor Thomson, the man whose name is joined with his in the title of the company, is not directly connected with the concern, but is a professor of physics in Philadelphia.

## A Safe Investment.

Is one which is guaranteed to bring you satisfactory results, or in case of failure a return of purchase price. On this safe plan you can buy from our advertised druggist a bottle of Dr. King's New Discovery for consumption. It is guaranteed to bring relief in every case, when used for any affection of the throat, lungs or chest, such as consumption, inflammation of lungs, bronchitis, asthma, whooping cough, croup, etc., etc. It is pleasant and agreeable to taste, perfectly safe, and can always be depended upon. Trial bottles free at W. S. Lloyd's drug store.

## Curious and Accidental Cures.

A gentleman was suffering from an ulcerated sore throat, which finally became so swollen that his life was despaired of. When his household came to his bedside to bid him farewell, each person grasped his hand for a moment and then, turning, went out weeping. A pet ape, which had modestly waited till the last, then advanced and grasping his master's hand for a minute, also turned and went away with his hand to his eyes. This assumption of deep grief, which it is hardly possible the animal could have really felt, was so ludicrous in its perfection, that the sick man was seized with an uncontrollable fit of laughter, which broke the ulcer in his throat, whereby his life was saved.

The great Erasmus laughed so violently, while reading the Epistole Obscurorum Vivorum (letters of obscure men against monks), that he broke an imposthume and saved his life.

A somewhat similar story is related of the celebrated grammarian, Urbain Domergue, who had an abscess on his throat, which broke in a fit of passion with which he fell on his physician for committing a solecism in grammar. Rev. George Harvest, rector of Thames Ditton (England), was very absent-minded, so that on one occasion he went into a friend's house and, seeing no servant, he rambled over it, finally entering the room of an old lady, ill of a quinsy. He stumbled over a clothes-horse and his awkwardness made the patient burst into such a fit of laughter that the quinsy broke and she lived many years to thank him.—[American Notes and Queries.]

## Bucklen's Arnica Salve.

The best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever sores, tetter, chapped hands, chilblains, corns, and all skin eruptions, and positively cures piles, or no pay required. It is guaranteed to give satisfaction, or money refunded. Price 25 cents per box. For sale by W. S. Lloyd.

An exchange says that the men just now most in need of situations are the playwrights. This is wrong surely. There are numerous members of the last Congress in this country just dying for employment.—[Williamstown Opinion.]

For sore throat.—Saturate a flannel bandage with Chamberlain's Pain Balm and bind it on the throat. It will cure any ordinary case in one night's time. For sale by T. G. Julian.

Children Cry for Pitcher's Castoria.

The following would indicate that there is still hope for the paralyzed. Frank Cornelius, Purcell, Indian Territory, says: "I induced Mr. Pinson, whose wife had paralysis in the face, to try a bottle of Chamberlain's Pain Balm. To their great surprise before the bottle had all been used she was a great deal better. Her face had been drawn to one side, but the Pain Balm relieved all pain and soreness, and the mouth assumed its natural shape." It is also unequalled for rheumatism, lame back, sprains, swellings and lameness. 50 cent bottles for sale by T. G. Julian.

## Can't Sleep Nights

Is the complaint of thousands suffering from Asthma, Consumption, Coughs, etc. Did you ever try Dr. Acker's English Remedy? It is the preparation known for all Lung Troubles. Sold on a positive guarantee at 25c and 50c. T. G. Julian, druggist.

## That Terrible Cough

In the morning, hurried or difficult breathing, raising phlegm, tightness in the chest, quickened pulse, chilliness in the evening or sweats at night, all or any of these are the first stages of consumption. Dr. Acker's English Cough Remedy will cure these fearful symptoms, and is sold under a positive guarantee by T. G. Julian.

## A Cure For Paralysis.

Frank Cornelius, of Purcell, Ind. Ter., says: "I induced Mr. Pinson, whose wife had the paralysis in the face, to buy a bottle of Chamberlain's Pain Balm. To their great surprise before the bottle had all been used she was a great deal better. Her face had been drawn to one side; but the Pain Balm relieved all pain and soreness, and the mouth assumed its natural shape." It is also a cure for rheumatism, lame back, sprains, swellings and lameness. 50 cent bottles for sale by T. G. Julian.

## ATTENTION!

We have strictly low prices for everybody.

Our stock of Heating and Cook Stoves is ready for you.

Come yourself and bring your friends, and we will interest you.

Our large and handsome stock of Queensware and Lamps will be offered at very low prices until Jan. 1st.

We can sell you Coal Vases and Coal Hods lower than ever before.

If you don't think we mean what we say, call and see us, and we will convince you.

Our terms are cash, so you do not have to help make up anybody's losses.

Our stock of Hardware is always large and good.

Come and see us and get our prices, whether you want to buy or not.

W. P. OLDHAM & CO'S.
